## **SAFETY RECALL NOTICE**

June, 2006

Dear Suzuki Owner:

This notice is being sent to you in accordance with provisions of the Canadian Motor Vehicle Safety Act. Suzuki Motor Corporation has determined that a defect which relates to motor vehicle safety exists in certain 2006 LT-R450 Quadracers all terrain vehicles.

The LT-R450 Quadracer is equipped with a rear suspension cushion lever mount bracket which is welded to the frame and bolted to the rear suspension cushion lever. The cushion lever is bolted to the rear shock absorber and swingarm. On affected vehicles, high stress from making jumps and landing with the rear brake applied can impart forces to the rear suspension cushion lever mounting bracket. This may result in stress cracks or breakage of the rear suspension cushion lever mount bracket. If the bracket breaks, the rider can lose control of the vehicle, possibly resulting in injury or death. According to our records, you own one of the vehicles affected by this Recall.

To correct this problem, your Suzuki dealer will apply a bead of weld to the rear suspension cushion lever mount bracket or replace the frame if the rear cushion lever mount bracket has a stress crack which exceeds the specification. This service will be performed on your vehicle at no cost to you for parts or labour.

Please contact your Suzuki dealer to schedule an appointment for this Important Safety Recall. To minimize the risk of injury or death, do not ride or allow anyone else to ride your vehicle until repaired by your dealer. If you no longer own this vehicle, please complete the enclosed postage paid reply card and return it to us.

We sincerely regret any inconvenience this Safety Recall may cause, but we are certain you understand our interest in your safety and your continued satisfaction with your new Suzuki.

Sincerely,

SUZUKI CANADA INC.
