

Dear ATV Owner

IMPORTANT: If your ATV is fitted with a 2500 to 3500 lb WARN winch this recall procedure may apply to you. Please read the following!

This notice is being sent to you in accordance with the requirements of the Canadian Motor Vehicle Safety Act. Warn Industries Inc. has determined a defect, which relates to motor vehicle safety, may exist with ATV's fitted with these WARN winches sold between May 2001 and September 2005.

A component of some winch kits, the 8 post contactor, can continue to pull current when in the off position, which can cause it to overheat and may pose a fire hazard. Consumers with winch kits containing these 8 post contactors should immediately disconnect the contactor from the battery* and contact Warn Industries, Inc. or your local dealer for a free replacement contactor or information on having your dealer perform this replacement for you free of charge. Please Note: 4 post contactors are not subject to the recall.

8 Post Contactor

Warn Industries, Inc., www.warn.com 1-866-408-3767, or via e-mail at: contact@warn.com

* Further details on the recall, procedures on how to disconnect the 8 post contactor and order a replacement contactor can be found on WARN's website at www.warn.com.

Contact information for this notice has been supplied by your ATV manufacturer with your safety in mind.
